Professional Summary

Data Analyst with 4+ years of business operations experience and hands-on expertise in SQL, Python, and Power BI. Track record of translating raw data into actionable business decisions — from reducing stock variance by 15% through root cause analysis to building machine learning pipelines achieving 0.91 ROC AUC. Skilled at owning the analytics workflow end-to-end: data cleaning, exploratory analysis, dashboard development, and business reporting. Completed a six-month Data Science & AI Virtual Skill Development Program, building on certifications from OdinSchool, BCG, Deloitte, and Forage.

Technical Skills

SQL & Databases: Advanced SQL — complex joins, subqueries, window functions, aggregations, CTEs

ERP & Tools: SAP (inventory management), Advanced Excel (formulas, pivot tables, charts)

Visualization: Power BI (DAX, interactive dashboards, KPI tracking), Excel (Pivot Tables, advanced charts)

Python & Analytics: Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, EDA, Predictive Modeling

Business Analytics: Campaign analytics, pricing & discounting, attribution modeling, funnel & cohort analysis

Soft Skills: Stakeholder communication, cross-functional collaboration, report writing, root cause analysis

Professional Experience

Department Manager — Data & Operations — Reliance Retail (Managed Services)

Rudrapur, Uttarakhand

Oct 2021 – Present

- Managed inventory across 1,000+ SKUs using SAP, tracking stock movement and sales velocity, and applying root cause analysis that reduced stock variance by 15%.
- Built Excel-based reports, including advanced formulas and pivot tables, for department heads covering weekly and monthly KPIs, sales trends, and stock movement.
- Performed data cleansing and validation across SAP and Excel sources to ensure accuracy in reports used for procurement and staffing decisions.
- Collaborated with supply chain, sales, and operations teams to define reporting requirements and turn raw inventory data into insights for senior leadership.

Analytics Projects

Netflix Content Strategy Analysis — GitHub

Tech: Python, Pandas, NumPy, Matplotlib, Seaborn

- Investigated content strategy across Netflix's 6,200+ title catalog (2008–2021) to quantify programming mix and geographic sourcing priorities.
- Cleaned inconsistent metadata (1,969 missing directors, 476 missing countries) and parsed date fields to enable reliable trend analysis.
- Quantified catalog composition: movies account for 68% of titles vs. 32% TV shows, with TV-MA the dominant rating (33%).
- Identified the U.S., India, and U.K. as the top three content-producing markets, revealing repeat director/cast partnerships.
- Delivered cross-tabulated insights on type vs. rating to guide audience-targeted content planning decisions.

Swiggy End-to-End Data Analytics & Churn Prediction — GitHub

Tech: SQL, Python, scikit-learn, Power BI, Flask, Docker

- Tackled an 87.76% churn problem for a Swiggy-style platform by modeling relational data across 150K+ orders and 100K users.
- Engineered a 5-table SQL pipeline to uncover revenue concentration: 11,419 restaurants drive 80% of INR 964M revenue.

- Built a Random Forest churn classifier (ROC AUC 0.91) using RFM segmentation, with recency as the top predictor.
- Deployed the model as a live Flask app that scores real-time churn risk and auto-triggers retention offers.
- Delivered a 5-page Power BI dashboard with custom DAX KPIs for city- and restaurant-level performance visibility.

Virtual Skill Development Program

Data Science & AI Virtual Skill Development Program

Labmantrix Pvt. Ltd. — Virtual

Sep 2025 – Mar 2026

- Successfully completed a six-month virtual Data Science & AI Skill Development Program focused on industry-oriented analytics.
- Gained hands-on experience in SQL, Python, Power BI, Excel, Statistics, Machine Learning, and Data Analytics.
- Built multiple end-to-end analytics projects involving data cleaning, exploratory data analysis (EDA), feature engineering, predictive modeling, and business reporting.
- Developed interactive dashboards, KPIs, and analytical reports using Power BI and Excel for business decision-making.
- Strengthened practical skills in business analytics, data visualization, statistical analysis, and machine learning workflows using real-world datasets.
- Learned industry best practices for data preprocessing, model evaluation, dashboard development, and communicating business insights.

Certifications

- Certified Data Science Professional — OdinSchool, Oct 2025 (Credential ID: ODIN1005371)
- BCG — Introduction to Data for Decision Makers — Job Simulation, Forage
- Data Analytics Job Simulation — Deloitte, Forage
- Markets Quantitative Analysis (MQA) Job Simulation — Forage

Education

Certified Data Science Professional — OdinSchool

Apr 2025 – Oct 2025

Bachelor of Business Management (BBM) — Swami Vivekanand Institute of Management Science & Technology

2017 – 2020, GPA: 7.0/10

Diploma in Pharmacy — Govt. Polytechnic College, Dehradun

2014 – 2016, GPA: 8.0/10
